

High efficiency Ledbars

Refrigerated displays lighting for supermarkets, deli shops, butcheries

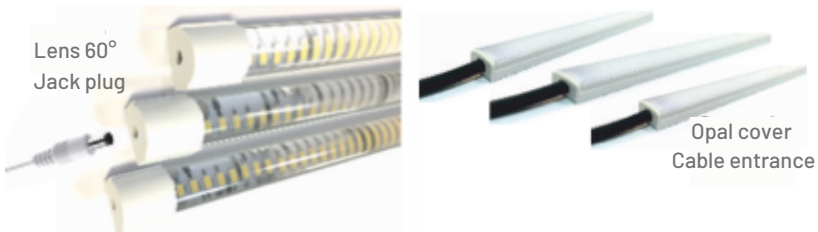

ED lighting especially studied for refrigerated food displays, due to the specific technology adopted, can guarantee:

Longer product life: 4Meat series is perfect for food related applications, exposed food products last longer.

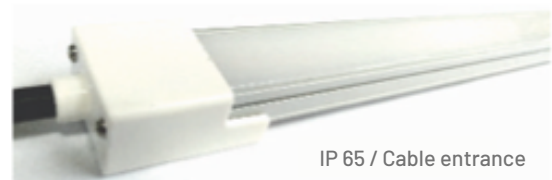

More brilliant and vivid colors for an eye-catching products display: customers are satisfied and enticed to purchase.

Traditional lighting helps meat discoloration changing its natural color and increasing bacteria growth.

Research has shown that customers project the perception of tenderness, taste and juiciness of the piece of meat, as well as good state of preservation, on its color and its appearance. This mainly happens in the deli department.

Available models:
from 200mm to 2000mm
CUSTOMIZED PRODUCTS

Features

Power Supply	24 Vdc
light Efficiency	145 lm/w
Chromatic index (CRI)	90
LED	smd 2538
N.LED/mt	160
Lightbeam	60° - 120°
Power	8,3 w/mt
Connection	Jack Plug 3,5 mm, cable exit
Work temperature	-20°C ÷ +45°C
Profile	Aluminium
Cover	PMMA semi-opal and opal, lense 60°

Options

Modular power supply system with 4-Split distributor
Continuous connection between two bars through accessory
Three kind of profile available, other models might be supplied upon customer's request
